Product name:

Betadex Sulfobutyl Ether Sodium

CAS:

182410-00-0

Grade:

Details:

Technical Parameter

Appearance: White powder, sweet, insipid and innocuous

Shelf life: 36 Months

Grade: Injection

Application: Pharmaceuticals

Molecular Weight: 1347

Standard: USP-NF2022, EP10.3, In-house Standard

Solubility: ≥ 100 (25°C, g/100ml)

Heavy metal: $\leq 0.0025\%$

Product Description

Sulfobutyl ether beta cyclodextrin sodium is a new type of anionic high soluble cyclodextrin derivatives. It could include drug molecules to form covalent

compounds so that increase the drug's stability, solubility, safety. It could reduce the renal toxicity, moderate drug's hemolysis, control the release rate and cover up the bad smell.

It can be used as a solubilizer, wetting agent, chelating agent (complexing agent) and polyvalent masking agent.

It has been used in injection, oral, nasal and eye medicines. It could have a special affinity and inclusion for nitrogen drugs.

Package:

20KG/Drum、 10KG/Drum、 1KG/Bag、 500G/Bag
